

Course description

The course takes place at any suitable location selected by the booking manager.

Delivery is handled by our nationwide team of expert trainers, who use a blend of theory and on-road practical training to identify areas of concern in driver behaviour, advise on ways to improve and demonstrate a range of advanced driving and defensive driving techniques.

This seasonally targeted course is designed to reinforce and enhance the knowledge of delegates for driving in severe weather and how to maximise the advantage available from 4x4/AWD vehicles if utilised correctly. It is designed to reduce risk factors and possible risks when driving in winter conditions. Drivers will also be advised about the correct vehicle and personal checks to make in the event of more severe inclement weather.

Digital assessment reports are accessible to employers post training and provide the detail of the training and a risk rating to help employers manage their ongoing risk removing the unknown.

Who is the course for?

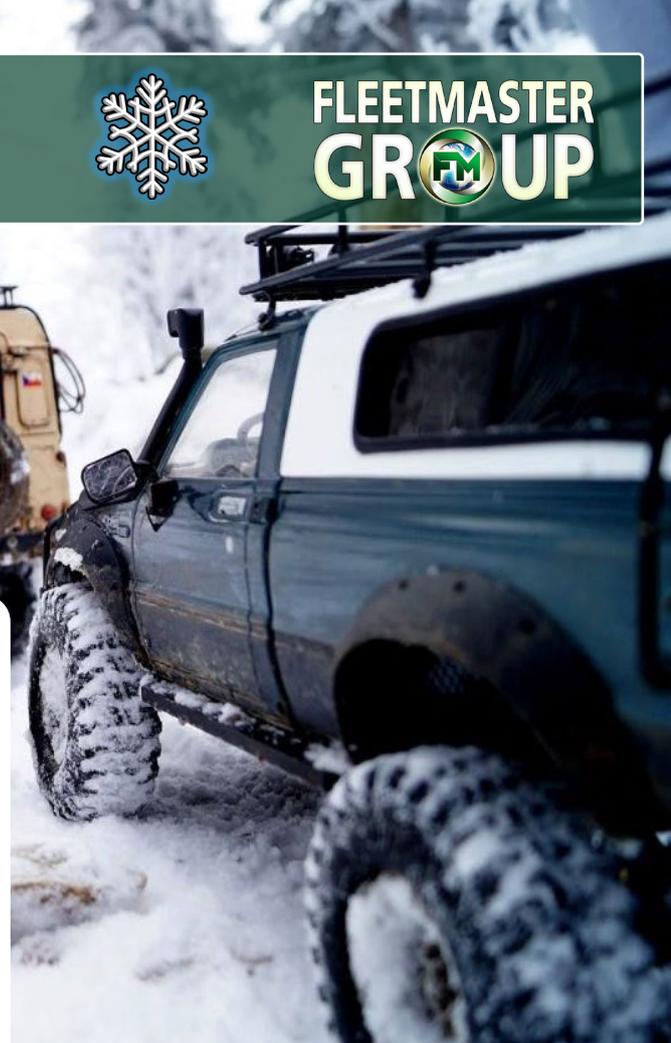

Any driver that uses a 4x4/AWD vehicle to familiarise and maximise the benefits from technology and controls available on the vehicle they use on company business.
